

FINANCIAL DATA ANALYSIS WITH R/RMETRICS

BRINGING THE POWER OF R/RMETRICS TO THE FINANCIAL COMMUNITY IN INDIA

R/RMETRICS AND FINANCE

Financial Data Analysis & Modeling with R/Rmetrics

Rmetrics Association (Asia Chapter) is collaborating with IGIDR, Mumbai, to hold a series of workshops to address increasingly diverse but relevant topics in financial data analysis that can be tackled using the R/Rmetrics programming environment.

R is being used by a growing number of data analysts inside corporations and academia.

Apart from numerous universities across the world, Companies as diverse as Google, Pfizer, Merck, Bank of America, the Inter - Continental Hotels Group and Shell use it.

The emergence of R as the lingua franca of the statistical, financial and other applied sciences communities can be attributed to the diverse and exhaustive universe of R packages that incorporate and make it easy to use latest research breakthroughs and insights.

While there has been a lot of enthusiasm for R in India, there has been no formal and regular platform for the R user community

to meet, learn from each other and exchange ideas.

The *Financial Data Analysis with R* series of Workshops is meant to be an attempt to bridge the gap between experts and the R community in the financial domain, and bring the suitability of R for financial engineering into focus.

The workshop will be two days in duration, and will comprise of

lectures from experts in R from both industry and academia.

Every workshop will be preceded by a one day workshop introducing the R programming environment that can be attended by enthusiasts new to R or for veterans who

want to refresh their R basics.

For the year 2011-2012, the workshops will be concentrating on Portfolio Design and Optimization, Time Series Data Analysis, and Panel Data Analysis. The weightage will be equal on both theory and practice with attention towards data visualization that R is aptly renowned for.

BANK OF AMERICA,
MORGAN STANLEY,
ROYAL BANK OF
SCOTLAND, GOOGLE,
PFIZER, MERCK AND
SHELL ARE A FEW
NOTABLE EXMPLES OF
THE MANY COMPANIES
USING R

MORE ABOUT RMETRICS

<https://www.rmetrics.org/>

Developed at ETH, Zurich, Rmetrics is the premier open source software solution for teaching, training and working with quantitative finance in R.

With a host of packages covering a vast range of topics, Rmetrics addresses the full range of diversity and complexity of financial engineering.

Whether it is rapid prototyping of new computational methods, statistical simulation and modeling, cutting edge data and model visualization, or parallel statistical computing, Rmetrics provides easily extensible functionality for all of them.

FDA Calendar, 2011-12

FDA I - Advanced Portfolio Optimization

24-26 March*, 2011, Mumbai

FDA II - Time Series Analysis

14-16 July*, 2011, Mumbai

FDA III - Panel Data Analysis

22-24 September*, 2011, Mumbai

FDA IV - Advanced Portfolio Optimization

30-01 November*, 2011, Mumbai

FDA V - R Conference, India

02-04 February*, 2012, Mumbai

* The dates are subject to change.

Speakers in the FDA Series of Workshops for 2011-12

- Dr Mahendra Mehta
Rmetrics Association (Asia Chapter), Mumbai
- Dr Susan Thomas
Indira Gandhi Institute of Development Research, Mumbai
- Dr Diethelm Wurtz
Rmetrics Association, ETH, Zurich
- Dr Ajay Shah
National Institute for Public Finance and Policy, New Delhi
- Yohan Chalabi
Rmetrics Association, ETH, Zurich
- Dr Deepayan Sarkar
Indian Statistical Institute, New Delhi
- Vishal Belsare
Economist, CRISIL
- Soumendra Prasad Dhanee
Rmetrics Association (Asia Chapter), Mumbai
- Sayan Dasgupta
Analytics Consultant, 24/7 Innovation Labs, Bangalore
- Rajat Tayal
Research Scholar, IGIDR, Mumbai
